

SIX TIPS

FOR KEEPING YOUR WINDOWS SPARKLING CLEAN

Many people assume a bottle of glass cleaner and a roll of paper towels are all you need for sparkling clean windows, but that's not always the case. Here are six tips for achieving a streak-free shine that will stay that way long after you're done.

1

USE THE RIGHT TOOLS

- ✓ Two squeegees – one for inside and one for outside
- ✓ Bottled 50/50 vinegar-hot water cleaning solution
- ✓ Paint can opener for removing window screens
- ✓ Soft cotton rags for dusting and drying

2

USE PROPER TECHNIQUE

- ✓ Remove dirt and dust from the window, sill and frame before applying solution
- ✓ Work from the top down in long, smooth strokes
- ✓ Clean one side with horizontal strokes and the other vertical to minimize streaks

3

CLEAN AT THE RIGHT TIME

Clean in the early morning or late afternoon to avoid smears and streaks caused by midday sunlight.

4

BUFF WHEN NECESSARY

Buff out streaks and smears with a microfiber or chamois towel if they develop after the surface dries.

5

ELIMINATE TOUGH STAINS

An old tooth brush works wonders on bird waste, tree sap, paint spots and other tough stains.

6

DON'T FORGET UPKEEP

HomeAdvisor recommends cleaning windows once every month or two for maximum shine.¹
